PROFILE

Creative full-stack web developer and graphic designer capable of executing innovative solutions. I'm a passionate team player and diligent professional, accustomed to deadline-driven environments. In general, a cool guy to add to your team.

PROJECTS

Animal Trivia
Animal Trivia is simple trivia application, built using HTML, CSS and JavaScript. Test your knowledge and learn something about the animal kingdom. This game is fashioned in a simple trivia format (question and possible answers).

P-Dex
P-dex is a full stack application, built using Mongoose, Express, Handlebars, and Node. P-Dex is designed for adding, editing, and removing pokémon information.To get started: Enter the Dex by clicking on the pokéball. Once you have entered the Dex, click on the 'Add A Pokémon' button to add pokémon. Fill out the information on the add page and submit. Once your pokémon has been added to the list, they may be edited by clicking on the specific pokémon. Image links can be found on Bulbapedia. Just right click and select 'Copy Image Address'.

Dollar Beer Club (Group Project)
This is Front-End part for the MERN application website - "Dollar Beer Club" that provides complete CRUD functionality as well as access to the 3rd party API BreweryDB. The website is meant to help brew enthusiasts find and acquire their favorite brew. For this project, I contributed to the front-end development of the site. My tasks were to design, style and layout structure for the site. I also developed the shop's mapping component.

SOFTWARE SKILLS

HTML / CSS / JavaScript / MongoDB / Node.js / Express / React / Materialize / SASS / Ruby on Rails / Git / SQL / Adobe Photoshop, Illustrator, and InDesign
