Mr. Karl Peña
ScientiaMobile
11180 Sunrise Valley Drive #220
Reston, VA 20191

Dear Mr. Karl Peña,

I was referred to ScientiaMobile by the staff at my school, in regards to your advertisement for a front-end developer. I believe the work your company does is innovative in the field of Mobile/Web Development. I'm interested in joining the ScientiaMobile and I am confident that my background skills in graphic design can be used with my coding experience, to offer creative ways to solutions.

I enjoyed reading about your company's history and how it started with a thought and an open-sourced project. It immediately invokes the vision of innovative thinking. What influenced your approach to the development of WURFL?

I am a recent graduate of the full-stack 12-week intensive, Web Development Immersive program at General Assembly. In this program, I'm learned to use JavaScript, React to develop front-end applications, and Ruby on Rails and Express for back-end focused development.

I look forward to speaking with you to learn more about this opportunity and discuss my candidacy further. I can be reached by phone at 240-475- 4581 or by email at alonzo.k.moses@gmail.com. I have also submitted a link to my online portfolio, located on my resume. Thank you in advance for your time.

Sincerely,

Alonzo K. Moses II
